

# ADORA3 (E318) polyclonal antibody

Catalog: BCP00159 Host: Rabbit Reactivity: Human, Mouse, Rat

#### **BackGround:**

Adenosine is involved in a variety of processes, including the synthesis of urea, the anti-inflammatory response and the inhibition of protein synthesis The adenosine receptors, including adenosine A1-R, adenosine A2A-R, adenosine A2B-R and adenosine A3-R, are integral membrane proteins that are members of the G protein-coupled receptor family. The A1-R protein mediates ureagenesis in a partially calcium-dependent manner. Adenosine is known to mediate coronary vasodilation via the A2A-R receptor. Collagen synthesis and total protein synthesis are inhibited in certain cells by adenosine, acting via the A2B receptors. Activation of the A3-R receptor inhibits the induction of the cytokine TNF $\alpha$  and blocks the endotoxin CD14 receptor signal transduction pathway.

#### **Product:**

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

## **Molecular Weight:**

~ 38 kDa

## **Swiss-Prot:**

P33765

## **Purification&Purity:**

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

# **Applications:**

IHC: 1:50~1:200 IF: 1:50~1:200

## **Storage&Stability:**

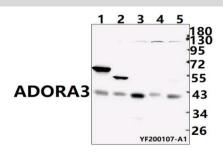

Store at  $4\,\mathrm{C}$  short term. Aliquot and store at -20  $\mathrm{C}$  long term. Avoid freeze-thaw cycles.

## **Specificity:**

ADORA3 (E318) polyclonal antibody detects endoge-

nous levels of Adenosine receptor A3 protein.

## **DATA:**

Western blot (WB) analysis of ADORA3 pAb at 1:500 dilution

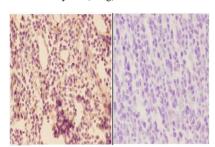

Lane1:C6 whole cell lysate(40ug)

Lane2:SHSY5Y whole cell lysate(40ug)

Lane3:SP2/0 whole cell lysate(40ug)

Lane4:A549 whole cell lysate(40ug)

Lane5:Jurkat whole cell lysate (40ug)

Immunohistochemistry (IHC) analyzes of ADORA3 (E318) pAb in paraffin-embedded human tonsil carcinoma tissue at 1:50, showing cytoplasm and membrane staining. Negative control (the right) Using PBS instead of primary antibody, secondary antibody is Goat Anti-Rabbit IgG-biotin followed by avidin-peroxidase.

## Note:

For research use only, not for use in diagnostic procedure.
