## SSB (phospho-S366) polyclonal antibody

Catalog: BCP01559

## BackGround:

$\mathrm{Ro} / \mathrm{SSA}$ is a ribonucleoprotein that binds to autoantibodies in 35 to $50 \%$ of patients with SLE and in up to $97 \%$ of patients with Sjogren syndrome. The Ro/SSA particle consists of a single immunoreactive protein noncovalently bound with one of four small RNA molecules. Most anti-Ro/SSA-positive sera have antibodies not only against the immunoreactive protein, but also against an Ro/SSA protein. The genes which encode the two proteins map to human chromosomes 11 p15.5 and 1q31, respectively. La/SSB is an autoimmune RNA-binding protein that plays a role in the transcription of RNA polymerase III was originally defined by its reactivity with autoantibodies from patients with Sjogren syndrome and SLE.

## Product:

Rabbit $\mathrm{IgG}, 1 \mathrm{mg} / \mathrm{ml}$ in PBS with $0.02 \%$ sodium azide, 50\% glycerol, pH7.2

## Molecular Weight:

$\sim 52 \mathrm{kDa}$

## Swiss-Prot:

P05455

## Purification\&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is $>110 \%$ (by SDS-PAGE).

## Applications:

WB: 1:1000~1:2000

## Storage\&Stability:

Store at $4^{\circ} \mathrm{C}$ short term. Aliquot and store at $-20^{\circ} \mathrm{C}$ long term. Avoid freeze-thaw cycles.

## Specificity:

p-SSB (S366) polyclonal antibody detects endogenous levels of SSB protein only when phosphorylated at Serine 366.

## DATA:

Western blot (WB) analysis of p-SSB (S366) polyclonal antibody at 1:1000 dilution

Lane1:HEK293T whole cell lysate
Lane2:HEK293T treated with EGF( $0.1 \mathrm{ng} / \mathrm{ml}, 15 \mathrm{~min})$ whole cell lysate Lane3:HEK293T treated with EGF( $0.1 \mathrm{ng} / \mathrm{ml}, 30 \mathrm{~min}$ ) whole cell lysate Lane4:HEK293T treated with $\operatorname{EGF}(0.1 \mathrm{ng} / \mathrm{ml}, 60 \mathrm{~min})$ whole cell lysate

## Note:

For research use only, not for use in diagnostic procedure.
