Complex Biotech Co., Ltd

## CD3E Recombinant Protein

Catalog: BCP3336

Host: E.coli

Tag: His-tag

His-tag

### BackGround:

When T cells encounter antigens via the T cell receptor (TCR), information about the quantity and quality of antigens is relayed to the intracellular signal transduction machinery. This activation process depends mainly on CD3 (Cluster of Differentiation 3), a multiunit protein complex that directly associates with the TCR. CD3 is composed of four polypeptides:  $\zeta$ ,  $\gamma$ ,  $\epsilon$  and  $\delta$ . Each of these polypeptides contains at least one immunoreceptor tyrosine-based activation motif (ITAM). Engagement of TCR complex with foreign antigens induces tyrosine phosphorylation in the ITAM motifs and phosphorylated ITAMs function as docking sites for signaling molecules such as ZAP-70 and p85 subunit of PI-3 kinase. TCR ligation also induces a conformational change in CD3 $\epsilon$ , such that a proline region is exposed and then associates with the adaptor protein Nck.

### Product:

PBS, 4M Urea, PH7.4

### Molecular Weight:

~18kDa

### Swiss-Prot:

P07766

### Purification&Purity:

Transferred into competent cells and the supernatant was purified by NI column affinity chromatography and the purity is > 85% (by SDS-PAGE).

### Restriction Sites:

NdeI-XhoI

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Expression Vector:

pet-22b(+)

### DATA:

### Note:

For research use only, not for use in diagnostic procedure.
